We extract data from input stream

OUTPUT STREAM :-

We insert data in output stream

JAVA support both bytes & character stream

BYTE STREAMS :-

INPUT STREAMS

[ABSTRACT CLASS]

→ File Input Stream

→ Byte Array Input Stream

→ char Array Input Stream

→ Sequence Input Stream

→ Object Input Stream

→ ~~Stream~~ ^{String} Buffer Input Stream

→ Filter Input Stream

Buffer Input Stream

Data Input stream

Line Number Input Stream

OUTPUT STREAMS

[ABSTRACT CLASS]

seq

Print

- File ^{out} Stream
- Byte Array ^{out} Stream
- Char Array ^{out} Stream
- String ^{out} Object Stream
- String Buffer ^{out} Stream
- Filter output stream

- Buffered o/p stream
- Data o/p stream
- Print stream
